Lighting Director

 Real Life Church · October 2020 – Present

- Weekend service lighting design & programming at the Clermont Campus
- Oversee 3 satellite campuses around Central Florida's lighting design and systems
- Volunteer training for operation of consoles and equipment (GrandMA2, Onyx)
- Collaborate with other creatives to ensure my lighting designs coincide with their other visual and musical elements (Music Directors, Graphic Designers, Video Editors, etc)
- Design stage lighting plot and changeover and provide 3D renders, CAD drawings and other documentation for the change in stage design and layout.

Production Coordinator

 Real Life Church · November 2017 – January 2020

- Provide leadership for volunteer teams and paid contractors
- Schedule staffing and volunteers for weekend services and various events
- Coordinate with various teams to execute services flawlessly
- Perform maintenance and upkeep of production equipment
- Frequency management for a campus with three live and active venues using Shure Wireless Workbench
- Configure Dante audio network for audio transmission of 128+ channels of audio
- Management of production network and configuration of switches & other network devices
- Configuration of video routers, which are used to route video from 16+ sources to 16+ destinations around the campus and for online broadcasting
- Configuration and operation of Sony video switchers
- Configure QSC Q-Sys platform and Medialon show controller
- Maintain lighting fixtures including Elation, ETC, Martin & Clay Paky brand fixtures

Audio Supervisor

 Lake County Schools · October 2013 – April 2018

- Volunteer/student role
- Mixing of 22+ channels of Sennheiser and AudioTechnica brand microphones for most maintange musicals and other productions
- Setup and breakdown of audio/visual equipment for each mainstage production
- Work alongside directors to make their visions for the sound design of a production a reality
- Train other students to property use and maintain equipment
- Perform equipment maintenance and create orders for any replacement parts
- Create maintenance and cleaning schedule for equipment to not only maintain and extend life of equipment, but to keep people safe from transmission of germs.
